

CARBON ACTIVEWEAR BALACLAVA

CODE **WTL**

HYDROPHOBIC WEAVE

It carries moisture to the outside so it can evaporate. The skin is always dry and thermoregulation is constant.

ALL BLACK

TECHNOLOGIES

- Hydrophobic weave

Balaclava made of Carbon Activewear®: it protects the neck and head, the most important parts of the body, which are particularly sensitive and extremely reactive to changes in temperature. On cold days, the patented SIXS Carbon Activewear® fabric eliminates body moisture and perspiration from the skin so that the sensation of cold is extremely reduced. Likewise on hot days - again exploiting the patented SIXS technology - it provides unrivaled comfort by preventing perspiration from building up. Sober and elegant look: monochrome and with a small logo on the front.

MATERIALS

Carbon Activewear®
Same breathability and thermoregulation characteristics as Carbon Underwear, but with a structure researched for outerwear.

CARE

SIZES

One size only

Breathability:	
Thermoregulation:	
Wind protection:	
H ₂ O protection:	

COMPOSITION

77% Polypropylene,
15% Polyamide, 5% Elastomer, 3%
Carbon Fiber
